

Case Study: Targeted Individuals and Neuroweapons

A popular claim in current societies is that of persons claiming to be 'Targeted Individuals' which are people like Havana Syndrome victims claim to be attacked by pulsed directed weapons or as we have seen Neuroweapons. Sheridan et al (2020) have drawn attention to the problem of Targeted Individuals through trying to understand the claims rather than treat them out of hand as implausible.

"Epidemiological data suggest that as many as 0.66% of adult women and 0.17% of adult men in the western world may suffer the subjective experience of being group-stalked ('gang stalked') at some point in their lives. Yet the gang stalking experience has been subject to little scientific study." (Sheridan, 2020)

She found that 8% of women stalking victims and 2% of male stalking victims were victims of gang or orchestrated stalking. Noting that others estimate that 70% of gang stalking victims are women, roughly correlates with the increased spike in women stalking victims compared to men (4:1), although men are less likely to report being stalked, so there may be under-reporting amongst males.

The issue of violence is a chief security concern when it comes to the study of TI. Many hold that they are victims of a program to make them into violent actors. They term this 'traumatic programming'. The levels of violent ideation among TI is something to note:

"A factor that stands out in the current study concerns the aggression with which sufferers responded to their experiences. Of respondents, 32% described experiences falling into the category "determined to fight back", while 16% made statements that fell into the category "development of hatred/violent tendencies". Examples include: "We can either go out on our feet or our knees and I plan to sell myself for as high a price as I can reap from them"; "I may have to kill them before they kill me"; and "I think the only way forward is to get some weapons and act". Violence in those who have complained of gang-stalking is not unknown. Sarteschi described the cases of four men who believed that they were so-called "targeted individuals" and that the organised efforts of those who targeted them constituted "gang-stalking". Collectively, the four men killed 28 people and injured 12 more. Sarteschi points to a need for intervention to prevent violent responses, and notes that the men whose cases were detailed in her study had engaged in significant efforts to make others aware of their perceived victimisation, these efforts taking the form of manifestos, videos and audio recordings, and social media posts. The violence perpetrated by these men was motivated by self-defence (in the form of a pre-emptive strike) and a need to alert the world at large to the dangers posed by gang-stalking. Serious violence appears to be rare in those experiencing gang-stalking phenomena. However, it is of note that the experiences grouped above under "invasive attack on the subject's body" constitute examples of threat-control-override symptoms, which have been linked with an increased risk of violence. It is also noted that the experiences and quotes above would satisfy criteria for the red-flag violence risk items of "homicidal ideation" and

“high-risk phenomena” in the stalking and threat risk assessment guides the Stalking Risk Profile and the Communications Threat Assessment Protocol.”

A chief component of this phenomenon is that of a sense of not just being stalked by an individual but by ‘gangs’ which can include according to the TI even the government and police, although usually secret intelligence are blamed for this phenomenon, many of the narratives disclose that they hear from their stalkers such claims as being CIA, FBI or MI-5 which seems implausible to self-incriminate, but the narrative they receive is that this is who is behind this behavior. Sarteschi (2018) explains the gang stalking take on this:

People across the world refer to themselves as “targeted individuals”(TIs) and claim to be the victim of gang-stalking. The New York Times conservatively estimates that there are at least 10,000 people claiming to be victims of gang-stalking. Their perpetrators are typically perceived to be powerful government or law enforcement officials, who are seeking to destroy the life of the TI. In retaliation, some have committed extreme violence... (Sarteschi 2018)

Sarteschi interviewed TIs and found the following categories and experiences common to many TI claimants. I have highlighted here the categories of interest from a Neuroweapons perspective:

- Physical surveillance/being followed: 47 (94%)
 - Victim of a conspiracy (by multiple agencies): 40 (80%)
 - Physical interference, intimidation and harassment: 33 (66%)
 - Electronic surveillance: 30 (60%)
 - Targeted by noise: 22 (44%)
 - Being remotely controlled/mind control: 20 (40%)
 - Subject to electronic hacking: 19 (38%)
 - Targeted by slander/gossip: 17 (34%)
 - Subject to clandestine, unauthorized entry to home: 17 (34%)
 - Voice to skull, or V2K, transmission. A widespread belief among targeted individuals that mind control technologies, based on microwave signals, are used to transmit sounds and thoughts directly into their heads: 13 (26%)
- (Sarteschi, 2018)

The following is a curated collections of aspects of gangstalking cross-referenced to other Targeted Individuals (TIs) experiences. It should be noted that the CIA in the 1970s wanted to create a systematic methodology of driving those leaving the agency as either agents or assets that might pose a threat to their organization crazy, a term they used was ‘lobotomized’ (Shapira, 2019). The primary source for these correlations are posts to the r/Gangstalking channel on Reddit, a news clipping and forums platform, reddit.com. Other sources have been taken from self-reports posted on such platforms as youtube.com.

Personal Testimonials about Gangstalking:

a) See interview of **Phillip Douglas Walker** for a first hand account of a TI dealing with resisting cyborgization.

He speaks of such things as forced speech, overwriting of personality, forced body movements. "I feel like I'm being automated out of my existence" (53:40 timestamp, Interview 12/8/18)

https://www.youtube.com/watch?v=2d_InLwaVYQ (accessed 3/16/19)

b) TI interview of former US Navy veteran, **Tivon Rivers**, <https://www.youtube.com/watch?v=B6UpIls2Tw> (published, June 24, 2017, accessed 3/1/19). Former ET in Navy. Engineering background in IT and researched 'free energy' tech. Notes that his stalkers voices are British, believes MI5 and SIS are involved in his stalking to some degree. He worked at Menwith Hill, where he believes surveillance stalking is conducted. He talks about the contextualization of the stalking, how strangers will speak to you about your business or life, only understandable by you as stalking related.

At 1:19:00 gives a technological overview, body frequencies, etc. One interesting technical observation he makes is that the targeters do not need to know your exact GPS loc, they can just flood a region, like Drogheda, and hit you, and everyone else of course. He terms the controllers a 'grass roots fascist system taking over different countries' [1:22:00 or so]. At around 1:53:00 starts talking about Luciferianism, his being reborn in Christ, and 'family line' is mentioned. Usual programming seems to be part of his narrative, part of steering.

d) **u/drunkenposting**, in his early 20s started experiencing gang stalking after going through a classified background check for a defense related job after graduating from college in mechanical engineering. <https://old.reddit.com/r/MyTortureJournal/>

e) **Abdelrahman Abdallah** - TI in UK, young Muslim killed himself, possibly under hypnotic trance he reported that he would be killed before hand, instead of committing act of prompted terrorism. Worked as a Security Agent or Guard, which is a repeating pattern among manchurian candidates. Was prompted to hate Gays and stalked by people perceived to be Gay, probably robotic control of homosexuals, which is akin and like that of the targeting of women. Divide

and conquer. He also talks of trying to be recruited by Salafis and he also believed that this was all do to MI5.

<https://www.youtube.com/watch?v=3LE74sugM78> (accessed 3/7/19)

Other Muslim Security Guards possibly targeted: Omar Mateen (Orlando Gay Club shooter), Ahmad Khan Rahimi (2016 NYC/NJ bombings) [looked zombied out on tv when captured, used pressure cookers like Boston Bombers, who were connected to CIA ex-agent Graham Fuller, the bombers mother claimed they were 'under the control of the FBI' the whole time]

Technical Note: "Norseen pointed out that subsequent to the theft of Brushlinsky's briefcase, a whole new genre of suicide bombers, very atypical of the previous norm, began operating. In addition, certain recognizable features of these techniques became noticeable to him and others familiar with the technology. Similar signatures were also appearing in various media contexts, such as popular songs and doom websites." (Norseen-Laurie, part 1, 2003)

Ahmad Enani interview with Ramaola D, <https://youtu.be/qYu4VR-zzEY>

Also apparently led to believe that homosexuals were stalking him, has a virulent homophobic program inside him. Find post on <https://neuralquantanamo.com/> where he talks about that. Was also stalked by police. He states in interview that he noticed increased activity around 2012, and mentions other TIs also noticed activity around this time, circa 2011. In interview he also brings up the bloodline motif, which seems to be mirrored in many TI accounts, i.e. Robert Duncan. He also mentions in the interview the use of sampling and playback, and mental projection, he noted that in conjunction with projections where DEW attacks, probably to increase anxiety and emotional instability. He also noticed synthetic telepathy in animals. He is also being programmed with anti-Semitism, good for a Muslim that they are trying to engineer into a terrorist.

He is stalked by military, which synchs up with a huge programming effort to blame the military for all TI activity.

"All I see is really bad b-movie theater" in describing the staged stalking.

g) **Jian Liang**, TI in Financial Services Industry. (video in reddit-gangstalking correlations directory, Report # 88 Jian Liang, MK ULTRA Whistleblower on Surviving.mp4) Interviewed by Romona D 12/19/18, https://www.youtube.com/watch?v=Xt3qp14_5Ak (accessed 3/9/19). She is the author of [MK-ULTRA NEVER ENDED: Absolute Mind and Soul Control In Government, Wall Street and The Secret Space Program](#) She says from her position that "the entities behind MK-Ultra [neuroweapons], the positions [senior management] are so important they cannot afford to lose control of them" (timestamp 08:02). She talks about when being in an induced electronic hypnotic state you cannot distinguish what is good or bad, for yourself, based on her direct experience. (timestamp 13:10) Physical symptom: tinnitus. She used a frequency scanner and saw that the frequencies changed, she believes this indicates that different frequencies are emanating from specific points in her body, otherwise the freq analyzer picks nothing up in other parts of her body. She did a health check with a forensics lab for heavy metals (indicative of electronic nanochips implanted. The report indicated she had heavy metals that should not be present in human beings. They also found drugs that she says she has never consciously willingly taken. (timestamp 17:00)

She says the frequencies were in the secret classified radio frequency bands. (Timestamp: 32:00) she talks about being put to sleep remotely, then woken up in a hypnotic trance, 'sleep walking'. She went through deprogramming for suppressed memories. She also experienced false friendships.

Regarding Hypnotic Trance and Hypnotic Control:

The following is taken from a TI activist site (<https://www.wanttoknow.info/mk/mk-ultra> [accessed 3/5/19]):

In mainstream culture, hypnotism is viewed as a type of 'science fiction', confined to the realm of magic tricks and entertainment. The truth is that hypnotism is very real and used both in mainstream psychology and in military intelligence.

Hypnotism was used by the United States military before the creation of the CIA, during World War II. Psychologist Dr. George H. Estabrooks recalled his involvement in the clandestine program to *Science Digest* in 1971, in an article titled "Hypnotism Comes of Age".

"One of the most fascinating but dangerous applications of hypnosis is its use in military intelligence. This is a field with which I am familiar through formulating guidelines for the techniques used by the United States in two world wars.

Communication in war is always a headache. Codes can be broken. A professional spy may or may not stay bought. Your own man may have unquestionable loyalty but his judgment is always open to question.

The "hypnotic courier," on the other hand, provides a unique solution. I was involved in preparing many subjects for this work during World War II. One successful case involved an Army Service Corps Captain whom we'll call George Smith. Captain Smith had undergone months of training. He was an excellent subject but did not realize it. **I had re-moved from him, by post hypnotic suggestion, all recollection of ever having been hypnotized.**

First I had the Service Corps call the captain to Washington and tell him they needed a report on the mechanical equipment of Division X headquartered in Tokyo. Smith was ordered to leave by jet next morning, pick up the report and return at once. These orders were given him in the waking state. Consciously, that was all he knew, and it was the story he gave his wife and friends.

Then I put him under deep hypnosis, and gave him—orally—a vital message to be delivered directly on his arrival in Japan to a certain colonel—let's say his name was Brown—of military intelligence. Outside of myself, Colonel Brown was the only person who could hypnotize Captain Smith. This is "locking." I performed it by saying to the hypnotized Captain: "Until further orders from me, only Colonel Brown and I can hypnotize you. We will use the signal phrase 'the moon is clear.' Whenever you hear this phrase from Brown or myself you will pass instantly into deep hypnosis." When Captain Smith re-awakened, he had no conscious memory of what happened in trance. All that he was aware of was that he must head for Tokyo to pick up the division report.

On arrival there, Smith reported to Brown, who hypnotized him with the signal phrase. Under hypnosis, Smith delivered my message and received one to bring back. Awakened, he was given the division report and returned home by jet. There I hypnotized him once more with the signal phrase, and he spied off Brown's answer that had been dutifully tucked away in his unconscious mind. The system is virtually foolproof. As exemplified by the case, the information literally was "locked" in Smith's unconscious for retrieval by the only two people who knew the combination. The subject had no conscious memo-

ry of what happened, so couldn't spill the beans. No one else could hypnotize him even if they might know the signal phrase..."

"The potential for military intelligence has been nightmarish. **During World War II, I worked this technique with a vulnerable Marine lieutenant I'll call Jones. Under the watchful eye of Marine intelligence I split his personality into Jones A and Jones B. Jones A, once a "normal" working Marine, became entirely different. He talked communist doctrine and meant it. He was welcomed enthusiastically by communist cells, and was deliberately given a dishonorable discharge by the Corps (which was in on the plot) and became a card-carrying party member.**

The joker was Jones B, the second personality, formerly apparent in the conscious Marine. Under hypnosis, this Jones had been carefully coached by suggestion. Jones B was the deeper personality, knew all the thoughts of Jones A, was a loyal American and was "imprinted" to say nothing during conscious phases.

All I had to do was hypnotize the whole man, get in touch with Jones B, the loyal American, and I had a pipeline straight into the Communist camp. It worked beautifully for months with this subject, but the technique backfired. While there was no way for an enemy to expose Jones' dual personality, they suspected it and played the same trick on us later." – *Science Digest*, April 1971²²²
